15+ Years Experience | +60 12356 3382 | anuar.jamlus@gmail.com
C-21-09 Clarita Tower, EcoSky Residences, 188 Jalan Kuching, 51200 Kuala Lumpur
Lead Frontend Engineer | Full Stack Developer

PROFESSIONAL SUMMARY

Accomplished Lead Full Stack Engineer with 10+ years of experience delivering mission-critical solutions in Capital Markets, Fintech, and E-commerce. Currently leading the Real-Time Data Fabric (RDF) team at Royal Bank of Canada, managing high-throughput T+1 data pipelines and large-scale orchestration. Expert in React/TypeScript with a strong background in architecting reusable component libraries and dynamic visualization tools. Proven track record in optimizing data footprints by 90% and leading cross-functional teams to deliver high-performance, cloud-native applications.

TECHNICAL SKILLS

Frontend Technologies: Frontend: React, TypeScript, Redux, React Query, Context API, CSS/SASS, JavaScript (ES6+).

Backend Technologies: Python, Apache Airflow, PHP (Laravel/Symfony), Redis, Node.js, RESTful APIs.

Databases: MongoDB, PostgreSQL, MySQL, Oracle DB, Kafka, Solace.

Tools & Frameworks: Kubernetes (Helm/kubectI), Docker, AWS (S3/Lambda), CI/CD, TDD, Figma, Jira, Confluence.

Development Practices: Agile/Scrum, Test-Driven Development (TDD), Code Reviews.

Leadership: Team Mentorship, Technical Architecture Design, Cross-functional Collaboration, Scrum Master, Sprint Management.

KEY PROJECTS & ACHIEVEMENTS

T+1 Feed System: Mission-Critical Data Pipeline | RBC

Challenge: Managing the high-integrity ingestion of multi-format financial data for the Capital Markets entity.

Solution: Managed an event-driven ingestion engine sourcing data from diverse formats, including Kafka, Solace, relational databases, and flat files, into a dual-stage MongoDB architecture.

Impact: Implemented a sophisticated mapping and lookup mechanism to transform raw data into unified specifications, ensuring 99.9% availability for T+1 reporting across downstream consumers.

High-Scale Data Orchestration & Optimization (Airflow & Redis) | RBC

Challenge: Processing 30GB+ unoptimized JSON datasets for Finance-IT and Reconciliations teams.

Solution: Engineered Apache Airflow DAGs utilizing Redis as a high-speed lookup cache for real-time data merging during ingestion.

Impact: Reduced data footprints by 90% (30GB to 2GB Parquet/CSV) and automated secure delivery from external SFTP to internal S3/NAS endpoints.

OpsHub: Dynamic Data Visualization Platform (ReactJS & Serverless) | RBC

Challenge: Enabling end-users to build custom dashboards without manual code deployments.

Solution: Maintained and optimised a library of modular, high-performance React widget components and built Serverless (Lambda-style) functions to aggregate data from fragmented sources.

Impact: Empowered downstream consumers to self-serve custom data views with real-time graphical and tabular UIs.

PROFESSIONAL EXPERIENCE

Lead Full Stack Developer - Royal Bank of Canada (RBC) | Kuala Lumpur, Malaysia

May 2024 – Present

Stack: Kafka, Solace, MongoDB, Apache Airflow, Redis, Python, React, Kubernetes, Helm

Data Engineering: Manage the lifecycle of the T+1 Feeds System, ingesting data from Kafka and Solace into a dual-stage MongoDB architecture for high-integrity reporting.

Frontend Development: Build and maintain a suite of reusable ReactJS widget tools for the OpsHub platform, enabling dynamic data visualization and custom reporting.

Orchestration: Developed complex Airflow DAGs to automate data delivery for vertical consumers, optimizing large datasets using Redis and Parquet.

DevOps: Oversee containerized application lifecycles within Kubernetes clusters, utilizing Helm and kubectl for deployment and system diagnostics.

Team Leadership & Agile: Lead the Real-Time Data Fabric (RDF) squad and serve as Scrum Master, facilitating ceremonies, removing blockers, and driving sprint execution for Capital Markets data initiatives.

Full Stack Web Developer - Databasik Software Pty Ltd | Melbourne, Australia (Remote)

July 2021 – April 2024

Stack: PHP, Laravel, MySQL, React, JavaScript, TypeScript

Frontend Transformation: Spearheaded the migration of Obee's legacy admin portal to a modern React/TypeScript stack, establishing a reusable component library to accelerate feature delivery.

API Integration: Architected the "Reserve With Google" integration, synchronizing scalable endpoints with Google's specifications for real-time booking updates.

Product Delivery: Collaborated cross-functionally with product managers, designers, and engineers to deliver high-performance, end-to-end booking features and mobile-ready user applications.

Lead Developer - Multi Feeds Ltd | London, United Kingdom (Remote)

September 2019 – June 2021

Stack: PHP, Laravel, MySQL, Docker, JavaScript

Product Architecture: Founding team member of an E-commerce SaaS startup; designed and implemented a scalable data transformation engine supporting 100+ platform specifications.

Full-Stack Development: Took ownership of end-to-end feature development, making key technical decisions on system design and performance optimization strategies.

UI/UX Design: Built responsive frontend interfaces with a focus on usability, clean UI/UX principles, and interface responsiveness.

PHP Developer - BAE Systems Applied Intelligence | Kuala Lumpur, Malaysia

October 2019 – December 2020

Stack: PHP, Symfony, Oracle DB, Docker, React

Application Maintenance: Core member of the team maintaining an enterprise cyber security monitoring platform using a React frontend and Symfony backend.

Quality Assurance: Collaborated with QA teams to deliver high-quality features meeting strict security and performance requirements.

Senior Backend Developer - Remark International | Kuala Lumpur, Malaysia

May 2019 – September 2019

Stack: Ruby on Rails, PostgreSQL, Docker

API Infrastructure: Maintained RESTful API infrastructure for a mobile health application serving insurance company integrations.

Development Practices: Practiced rigorous Test-Driven Development (TDD) to ensure code reliability and enable automated CI/CD pipelines.

Senior Web Developer - Poplook.com | Kuala Lumpur, Malaysia

March 2014 – May 2019

Stack: PHP, MySQL, Prestashop, Codeigniter, JavaScript

Operational Leadership: Drove sprint execution and technical decision-making for an e-commerce platform serving thousands of customers.

Architecture & Design: Conducted comprehensive analysis and design for new features to ensure scalability and optimal user experience.

Technical Exploration: Implemented emerging technologies to enhance user interaction and interface responsiveness.

Team Management: Led and mentored a team of 6 developers, fostering a culture of innovation and continuous growth.

Lead Developer - DataFeedExperts.com | London, United Kingdom (Remote)

May 2011 – March 2014

Stack: PHP, MySQL, Codeigniter, JavaScript

Platform Management: Designed and maintained a customized web platform for product data management for multiple clients.

Technical Support: Led the technical team in ensuring timely resolution of client support issues and feature requests.

Process Optimization: Conducted research and analysis to implement new services and optimize data processing workflows.

Webmaster - Labuan IBFC Incorporated Sdn Bhd | Kuala Lumpur, Malaysia

October 2008 – May 2011

Stack: PHP, MySQL, JavaScript, Joomla

Web Management: Managed and maintained the jurisdictional website for Malaysia's offshore financial centre.

Digital Marketing: Implemented SEO optimization strategies and managed digital marketing campaigns across major platforms.

SEO Developer - Relevant Traffic Ltd | London, United Kingdom

March 2007 – September 2008

Stack: Perl, PHP

Data Optimization: Developed customized data import scripts and optimized product feeds for major search engines and price comparison platforms.
